

Yusuf K. Al-Magsusi

Seattle, WA | YusufAlmag@gmail.com

Skills and Qualifications

- **Coding Languages:** C++, Go, Python
- **Technologies/Environments:** Git, HTML/CSS, Node.js, Visual Studios, IntelliJ, Clion, MongoDB
- Strong interpersonal and communication skills
- Time management and organizational efficiency

Education

Enrolled in Bachelor of Arts in Computer Science

June 2026, *Seattle Pacific University*

- GPA: 3.53 out of 4.0; awarded Merit Scholarship for Academics
- Dean's List Academic Achievement Award recipient
- **Relevant Coursework:** Data Structures and Algorithms I and II, Application Programming, Netcentric Computing, Concepts in Programming Languages, Algorithm Design and Analysis, Cybersecurity Fundamentals

Microsoft Certified: Azure AI Engineer Associate

2025

- Achieved certification demonstrating expertise in deploying, managing, and monitoring AI solutions on Microsoft Azure.
- Validated skills in natural language processing, computer vision, conversational AI, and responsible AI practices within cloud-based environments.

Technical Experience

Evaid — Investigation Case Management Platform | Python, TypeScript, React, FastAPI, Azure SQL 2025–2026

- Built a full-stack case management platform for law enforcement and private investigators to analyze evidence and map relationships between actors.
- Developed a FastAPI backend with Azure SQL, implementing a service layer pattern, soft deletes, partial updates, session auth, and CI/CD deployment on Azure.
- Integrated Azure Document Intelligence and Computer Vision OCR for automated evidence ingestion and used GPT-4o to build a reasoning pipeline that surfaces connections across case data.
- Built a React/TypeScript frontend with real-time notifications and collaborated with a four-person team using branch-protected Git workflows.

Big Data Graph Analysis | Language: Python

2025

- Engineered a high-performance graph analysis tool using Python and NetworkX to process an edge list containing over **5 million edges** and **800,000+ nodes**.
- Enabled dynamic subgraph generation based on user-defined root node and depth, with results output to CSV.
- Implemented all-pairs shortest path computation and inward closeness centrality analysis, exporting insights to structured CSV files for further analysis.

Mobile Workout Application | Languages: C++ & QML

2023

- Developed a cross-platform fitness tracking app to monitor **bench press, squat, and deadlift** progress.
- Included full CRUD (Create, Read, Update, Delete) functionality for tracking workout sessions.
- Integrated a simple recommendation engine that suggested weekly weight and rep goals based on past performance trends.

Additional Experience

Copacabana Restaurant: Manager

2018-2025

- Restaurant Manager with comprehensive experience overseeing both front and back of house operations.
- Skilled in all aspects of restaurant management, including customer service, hosting, table service, bussing, dishwashing, cashiering, food running, and inventory management, merchandise purchasing, financial reconciliation, and conflict resolution.

Seattle Pacific University Resident Advisor

2025-Present

- Manage a community of 20 residents, ensuring a positive, inclusive, and well-functioning living environment.
- Planned and executed 3-5 community events per quarter and weekly floor rhythms (e.g., group dinners, movie nights, study sessions), achieving consistent 70%+ resident participation rates
